

The Ethiopian sham election serves only the dictatorial government

The Tigray dictatorial ruling class was built on excessive military power. The regime indulged the country into extreme poverty. The corruption of the ruling class was one of the main machinery that put the country into the highest level of economic inequalities where the few members of the ruling class became the richest and the majority of the citizens are unable to even earn their daily bread. This high level of inequality resulted into absolute poverty, migration and loss of lives of hundreds of thousands of people. Today hundreds of thousands of Ethiopian people are living in hunger and insecurity in their own country. Some are cherished in Sahara desert and Mediterranean Sea while they were trying to escape from unfair and abusive government.

For the last 24 years, since the Tigray ruling class came to power, the corruption, displacement of people and human rights abuses have increased with the tremendous speed. This misery darkened the political space and eradicated people's hope for democracy. The Ethiopian people have been denied political freedom and rights of expression of their opinions. In this current regime, it is a crime to have different political opinion rather than supporting the Tigray ruling class's party. The Ethiopian regime recorded highest level of Human rights abuses, killings, and intimidations not only in African continent but also in the world.

The Tigray ruling class came to power with military force; it has built its dictatorial regime on military power and will continue to do so. One party dictatorship rule was the vision they had from the very beginning. They proved their vision within the last 24 years. In the future, they want to rule Ethiopia under one party dictatorship rule. The Tigray ruling class never listened to the Ethiopian people, nor willing to listen in the future. The responses to peoples' questions were imprisonments, tortures and killings.

The main priority for the Tigray ruling class is to stay on power. One of the strategies they designed to stay on power is to carry out fake election every five years. The last four elections proved that the ruling class is the most dictatorial regime on the planet. This 5th election that will take place on May 24, 2015 is not different from the previous elections. This election will not make any change to the political system and democracy in the country but it is only to renew the power of the ruling class for the next 5 years. This election is not democratic and not expected to fulfil the interest of the Ethiopian people. The election board is established by the current ruling class; the so called participating political parties are not treated fairly; the members of the opposition parties are arrested, harassed and beaten; the election process does not follow the democratic principle. Therefore, one can easily judge the outcome of such unfair and sham election.

The Ethiopian people were struggling for peace and democracy for several years. Among the people struggling for their rights the Oromo people was on the forefront. The Oromo people were struggling for many years and made huge sacrifices to regain their freedom and democracy. The Oromo people is not struggling to gain nominal seats in dictatorial government system but to become free from a century long political, economic and social domination. This objective cannot be achieved through participating in the election organised by the dictatorial ruling class.

Particularly to the Oromo youngsters and students, you have made significant sacrifices to move the Oromo struggle forward. In order to make your sacrifices yield a fruit, you must continue your struggle for freedom and democracy. Participating in this fake election means that you forget the sacrifices your brothers and sisters made. Participating in this election means that you're building the power of your perpetrators. From many years' experience, the OLF knows the plan and behaviour of the Tigray ruling class. The OLF knows that this regime is not prepared to leave its position even if they lose the election, which is unlikely within the current election process.

Therefore, the OLF wants to inform the Ethiopian people in general and the Oromo people in particular, that this election stands only to serve the Tigray ruling class and to keep them in power for the next 5 years. This election does not fulfil the interest of the Ethiopian people and does not lead to peace, stability and economic development of the country. The OLF wants to remind the Oromo and other people in Ethiopia that it should not be misled by this sham election.

Particularly to the Oromo people, you are the first target of the Tigray ruling class. The power and strength of this regime works against you. So the OLF remind you to stay away from any activity, including the current election that build the Tigray regime and keep them in power.

Victory to the Oromo people!

Oromo Liberation Front
